HISTORY & BACKGROUND

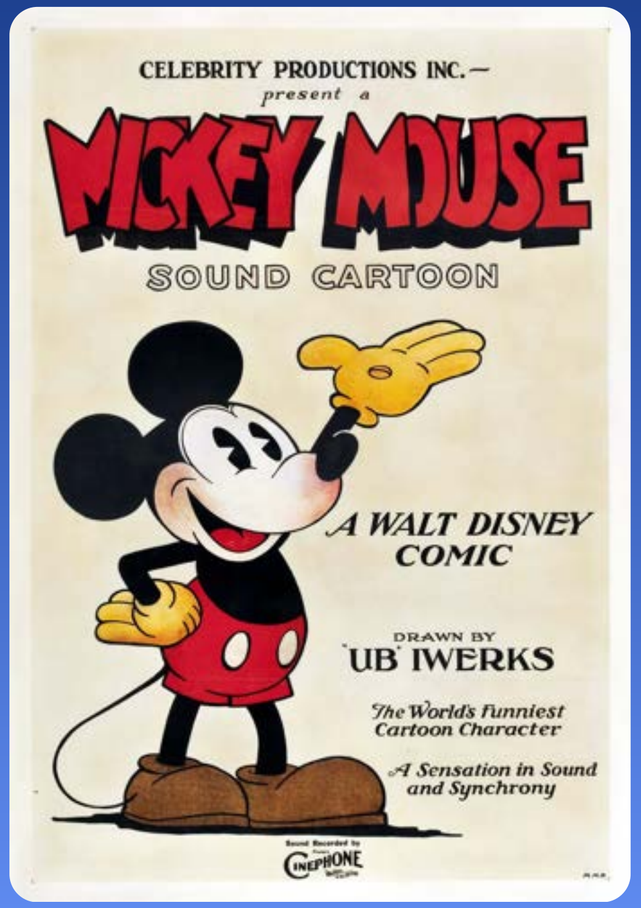

BACKGROUND

Disney began in 1923 when Walt Disney moved to California with his brother Roy. Together they opened a small studio called the Disney Brothers Cartoon Studio.

Their first success was the Alice Comedies, but after losing the rights to their character Oswald the Lucky Rabbit, Walt created a new one - Mickey Mouse.

With the release of Steamboat Willie in 1928, the first cartoon with synchronized sound, Mickey became a worldwide star and marked the true beginning of Disney's success.

The company grew even bigger with the release of its first full-length animated movie, Snow White and the Seven Dwarfs (1937). After that, Disney continued to create classics like Pinocchio, Bambi, and Cinderella.

1923

Walt and Roy Disney found the Disney Brothers Cartoon Studio in California

1928

Steamboat Willie premieres → Mickey Mouse becomes a global icon.

1937

Snow White and the Seven Dwarfs becomes the first full-length animated film

BACKGROUND

In the 1950s, Walt Disney expanded into television with shows such as The Mickey Mouse Club and turned his dream of a family theme park into reality with the opening of Disneyland in 1955.

Walt passed away in 1966 before seeing his next big project completed, but his brother Roy carried out his vision and opened Walt Disney World in Florida in 1971, which became one of the world's most popular vacation destinations.

Roy also passed away later that same year, but the brothers' creativity and strong vision continue to shape Disney many decades after.

1955
Disneyland opens in California

1966
Walt Disney passes away. His brother Roy continues his work

1971
Walt Disney World opens in Florida under Roy's leadership (he dies later that same year)

2012
Disney buys Lucasfilm (Star Wars)

2016
Shanghai Disneyland opens

2019
Disney buys 21st Century Fox and launches Disney

TODAY
Disney is a global leader in movies, streaming, and theme parks

Over time, Disney kept growing by buying Pixar, Marvel, Lucasfilm, and 21st Century Fox, and in 2019 launched its own streaming service, Disney+.

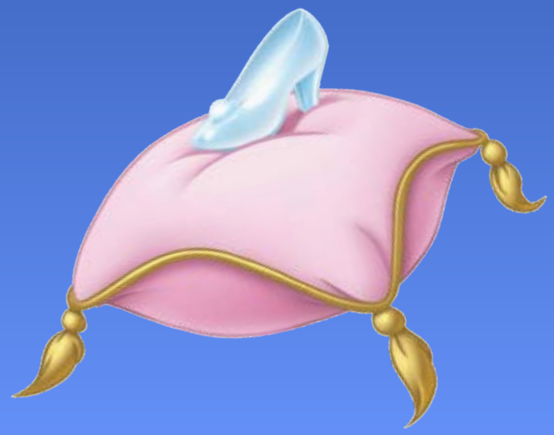

The company also expanded its theme parks worldwide, opening Disneyland resorts in Tokyo, Paris, Hong Kong, and Shanghai. Today, Disney is a global leader in movies, television, streaming, and theme parks, loved by millions around the world.

SERVICES & PRODUCTS

SERVICES & PRODUCTS

Disney offers a wide range of services and products that reach people all over the world. Its theme parks and resorts provide magical experiences for families, while the Disney Cruise Line offers vacations at sea with unique entertainment.

Cruises

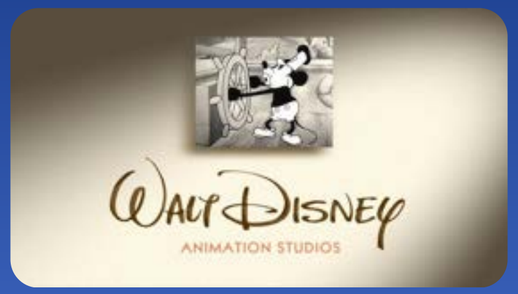

Theme Parks

Resorts

Disney is a leader in films, television, and streaming through Disney+. Through Walt Disney Animation Studios and other studios like Pixar, Marvel, Lucasfilm, and 20th Century, Disney creates world-famous movies and shows for audiences everywhere.

SERVICES & PRODUCTS

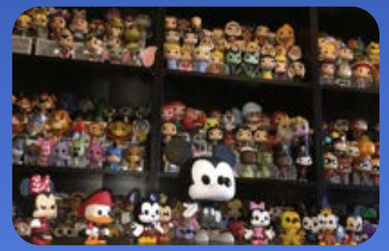

Disney used to have many Disney Store locations around the world, where fans could buy toys, clothing, and collectibles. However, most of these stores have now closed. Today, merchandise is mainly sold inside Disney parks and resorts or online through the official Disney website.

In addition, Disney creates and sells countless products and merchandise, from toys and clothing to collectibles and home décor, allowing fans to take a piece of the magic with them.

Disney also makes special collaborations with other brands such as Bath & Body Works, GAP, Pandora, LEGO, Funko Pop and others, creating unique items inspired by Disney characters and films.

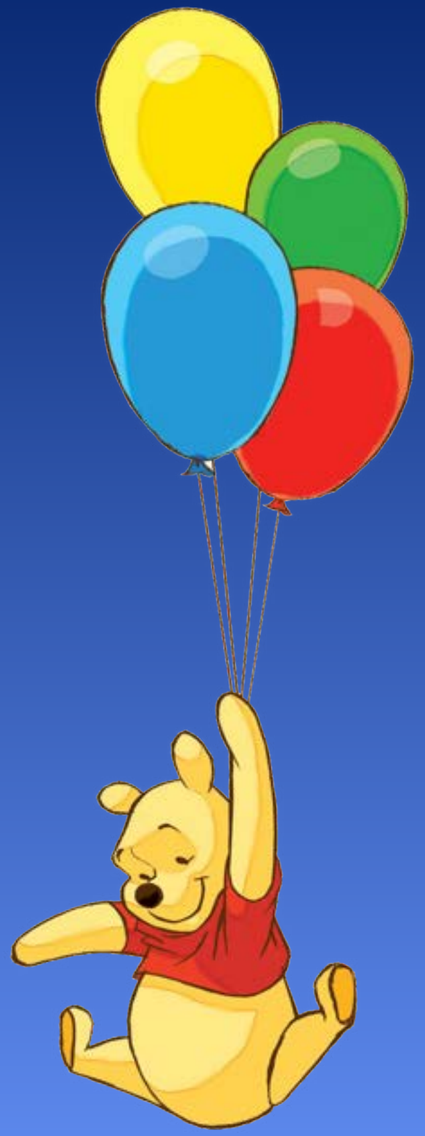

BRANDING

LOGO

The Disney logo, first introduced in 1956, is based on Walt Disney's signature and has become one of the most iconic symbols in the world. Over time, it evolved from simple wordmarks like "Walt Disney Productions" to the famous castle logo. In 2006, the castle was redesigned in 3D with music from When You Wish Upon a Star.

Walt Disney's signature

Walt Disney wordmark

BEFORE

AFTER

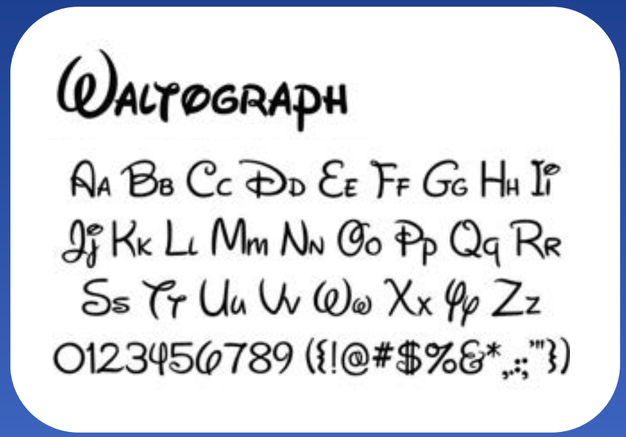

Today, Disney often uses the simple "Disney" wordmark on its movies and products, instead of the longer "Walt Disney Pictures" name. The wordmark is instantly recognizable around the world and keeps the brand modern, while the castle logo is still used for special openings and major productions.

TYPOGRAPHY

Waltograph is a freeware typeface based on the lettering of the Disney logo. It was first released in 2000 under the name Walt Disney Script and later renamed Waltograph in 2004.

The font is not Walt Disney's actual handwriting but an artistic version of the company's logotype, which itself came from Walt's stylized autograph.

Although unofficial and not endorsed by Disney, Waltograph has been widely used and even appeared in some Disney projects.

Disney uses different fonts in its films, parks, and branding to match each project's style. Movie titles often have custom fonts, like the special lettering in Frozen, The Lion King, or Moana.

At Disney Parks, signage and wayfinding use clear, readable typefaces like Arial and Century Gothic to help guests navigate easily, while ads and posters may mix playful decorative fonts with the classic Disney wordmark.

BRAND COLORS

The Classic Disney Color Scheme includes Dark Slate Blue (#393E8F), Oxford Blue (#12194A), Crayola's Orange-Yellow (#F3CC64), Upsdell Red (#B12228), Spanish Pink (#EFBEB7), and White (#FFFFFF).

These colors are used because they are bright, magical, and easy to recognize. The deep blues give a royal and fantasy feel, yellow adds warmth and energy, red and pink bring fun and excitement, and white keeps the design clean and timeless. Together, these colors create a look that feels classic, magical, and instantly Disney.

Disney usually does not stick to just one color palette. Instead, the company creates different palettes for each character, film, and theme park area.

Disney characters are designed with distinct color palettes that make them easy to recognize. Mickey Mouse is known for his red shorts, yellow shoes, and black ears. Cinderella is always linked with her light blue ball gown, symbolizing elegance and magic. Buzz Lightyear features green, purple, and white, matching his space ranger theme. Winnie the Pooh is instantly recognizable with his golden yellow body and red shirt. These unique palettes help bring each character's personality and story to life.

BRAND VALUES

IMAGINATION STORYTELLING CREATIVITY
FAMILY HAPPINESS SHARED EXPERIENCES
QUALITY TRUST WONDER

Disney's brand values focus on imagination, creativity, and storytelling. The company is built on creating experiences that feel magical, bringing joy to both children and adults.

Disney also values family, happiness, and shared experiences, making its parks, films, and products designed for people to enjoy together.

Around the world, Disney represents quality, trust, and wonder, inspiring audiences to dream big and believe in possibilities.

EXISTING WAYFINDING

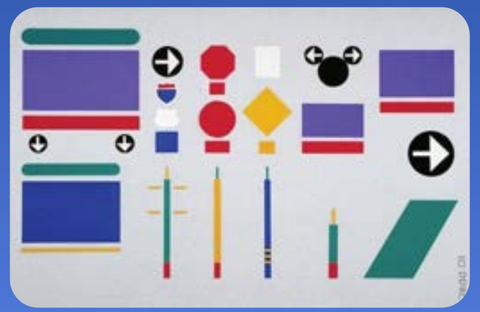

EXISTING WAYFINDING

Walt Disney World & Euro Disney Wayfinding

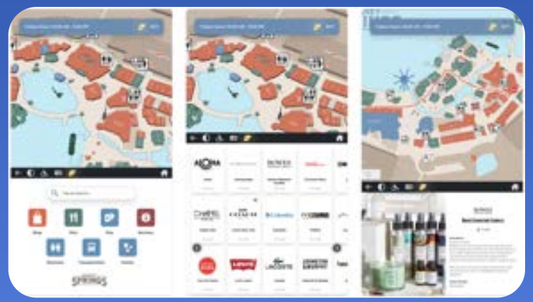

Stationary Braille Maps

Magic Kingdom Signage

RovelQ Digital Directories

Disney uses various wayfinding systems to guide guests, including color-coded signs, Mickey-shaped posts, braille maps, and themed signage that blends into park designs. Digital tools like RovelQ directories and mobile maps provide real-time directions, making the parks easier to explore while maintaining the magical atmosphere.

TARGET AUDIENCE

TARGET AUDIENCE

Families with children (core audience)

Tourists from around the world

Corporate Guests (conferences, exclusive events)

Disney Adults (millennial/Gen Z fans)

Event Visitors (honeymoons, birthdays, celebrations)

Disney's target audience includes a wide range of people. Its main focus is on families with children, but it also attracts tourists from around the world, as well as Disney Adults, millennial and Gen Z fans who enjoy the nostalgia and magic.

Many people visit for special events such as honeymoons, birthdays, or celebrations, and Disney also serves corporate guests through conferences and exclusive experiences.

PERSONAS

PERSONA #1

Marcus Jackson (Parent)

About

Gender: Male
Age: 34
Career: Project Manager
Status: Married with a daughter

Background

Marcus is a husband and father who is dedicated to his family. He finds balance between his busy career and his passion for mentoring young people through a local STEM program.

Goals

- Achieve the fastest, safest unloading and loading process for his kids and stroller.
- Locate a parking space that offers maximum adjacent space and is close to an accessible exit.

Pain Points

- Navigating the crowded parking lot with his family, especially at peak times.
- Feeling disoriented by the sheer size of the parking area.

PERSONA #1

Marcus Jackson (Parent)

Mindset

- "Every minute spent finding the car is a minute stolen from the magic."
- "I need space, safety, and clear directions. I can handle the cost, but not the hassle."
- "I must keep my children safe and contained at all times."

Stress Level

8/10 - Traffic and the chaos of the parking lot are his biggest stressors. He believes that a disorganized entry and exit will set a negative tone for the entire day.

PERSONA #2

Victoria (Conference Executive)

About

Gender: Female
Age: 42
Career: Senior Director of Business Development.

Background

She is highly professional and accustomed to premium travel experiences and corporate amenities, viewing any logistical hurdle as a waste of valuable time.

Goals

- Achieve the fastest possible transition to the conference room.
- Secure a parking space that provides maximum security for her vehicle and business property.

Pain Points

- Wasting time searching for a spot or navigating confusing signage.
- Insecurity or dimly lit areas, raising concerns about vehicle safety or theft of work materials.

PERSONA #2

Victoria (Conference Executive)

Mindset

- "I am here for business, not a vacation."
- “This parking is an extension of my premium conference experience."
- "I expect a VIP process, reflecting my company's high investment."

Goals

3/10: Her stress level remains low if the system works perfectly: the gate opens, LPR recognizes her plate, signage guides her clearly to the VIP zone, and she has a direct, short path to the building.

PERSONA #3

Chloe (Disney Adult Fan)

About

Gender: Female
Age: 24
Career: Digital Marketing Student
Status: Single

Background

Chloe is a student living in a busy urban center. She and her boyfriend, Alex, love to explore new places. They are visiting Disneyland for a fun getaway after a busy work period.

Goals

- Use digital and technology solutions (apps, LPR, mobile payment) for a completely frictionless parking process.
- Locate parking closest to the pedestrian access (escalator/ramp) for a quick walk to the main entrance.

Pain Points

- Having a difficult time finding parking, which would ruin the mood early.
- Being unable to find the correct entry point after parking.

PERSONA #3

Chloe (Disney Adult Fan)

Mindset

- "I know what I want to ride, and I need to get there now."
- "Technology should make this invisible."
- "Is there a shaded/top-level spot for the best lighting for my departure photo?"

Stress Level

6/10 - While she wants the day to be perfect, her stress level is manageable. A major traffic jam or getting lost in the parking lot could easily push it to an 8, as it would directly impact her mood and the time they have in the park.

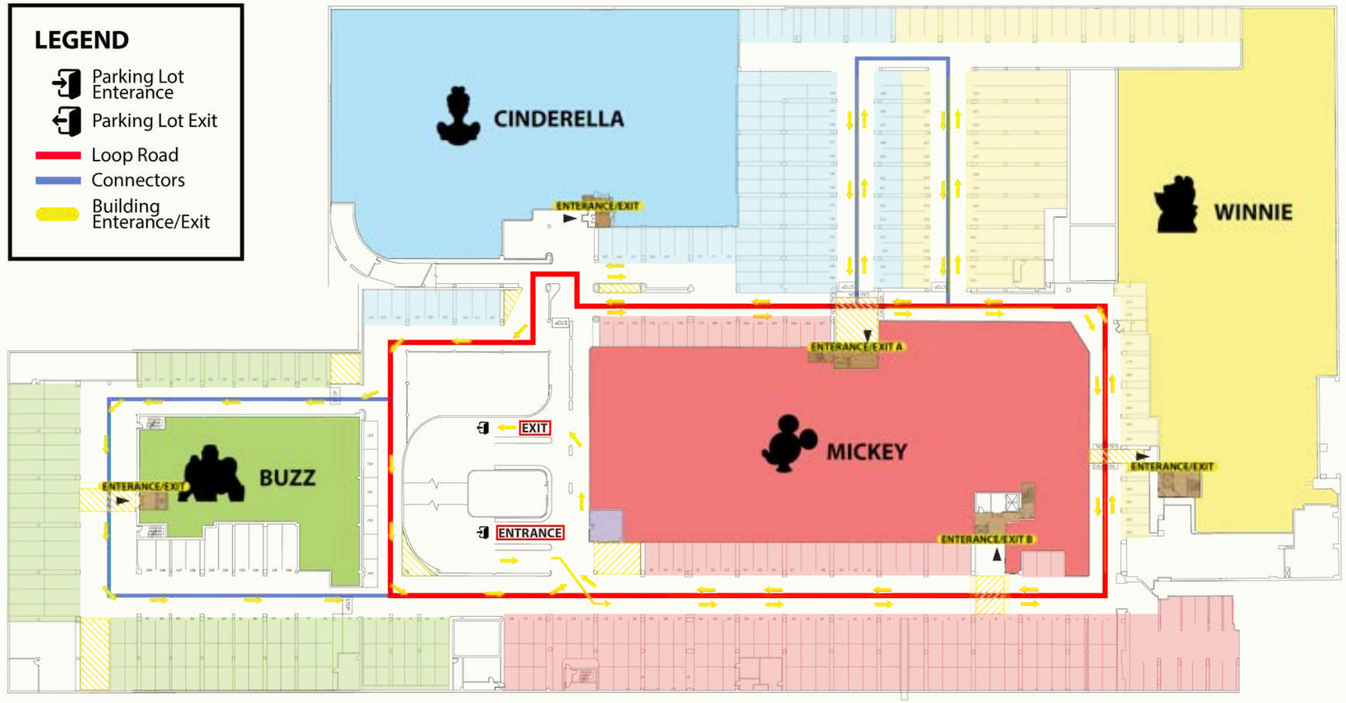

CIRCULATION DIAGRAMS

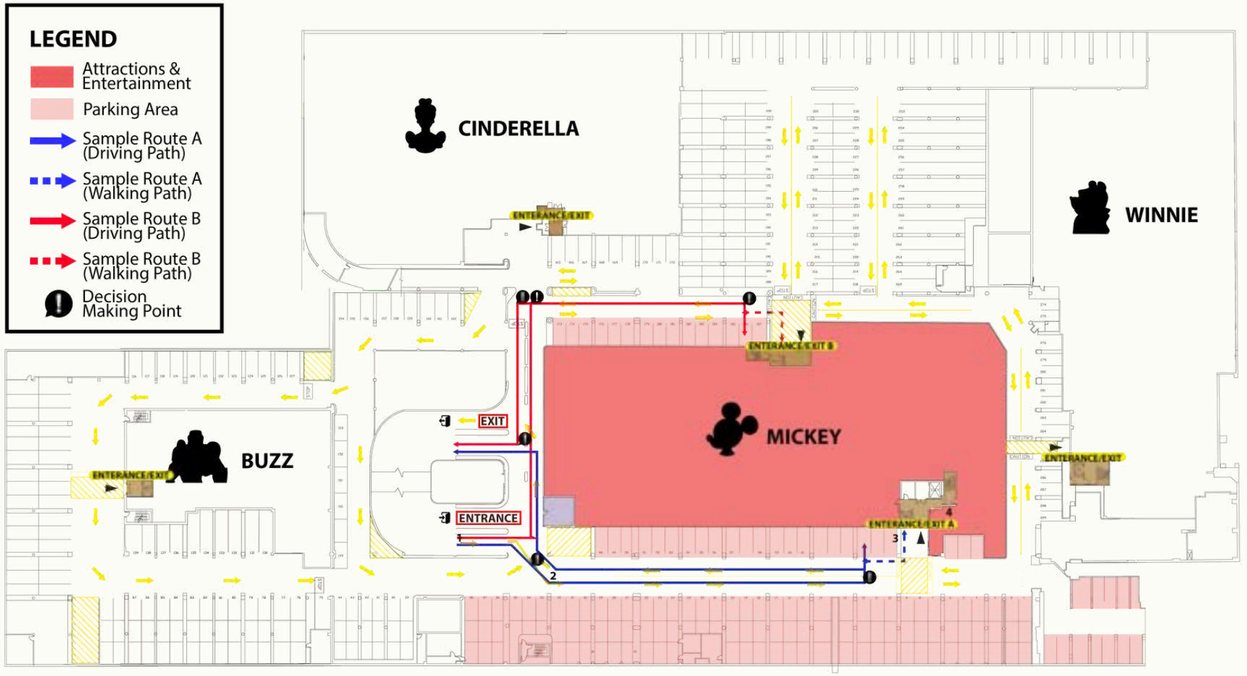

CIRCULATION DIAGRAM

LOOP ROAD

CIRCULATION DIAGRAM

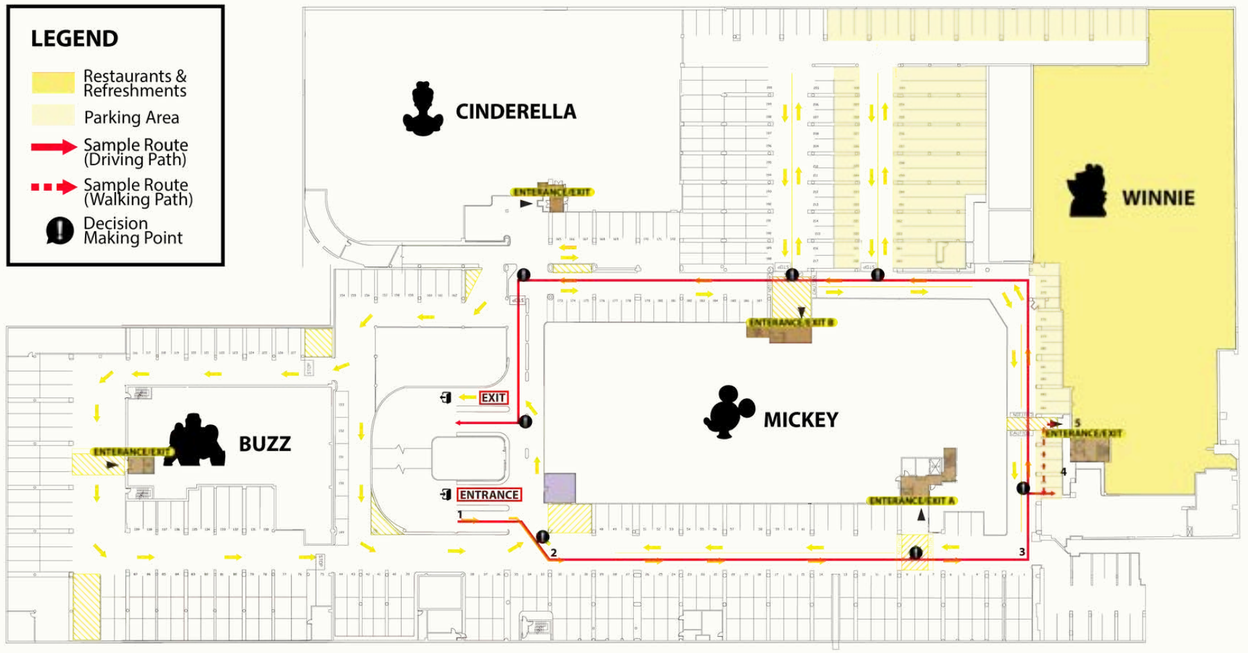

SAMPLE ROUTE - ATTRACTIONS & ENTERTAINMENT BUILDING

1. Enter the parking lot through the main entrance
2. Turn right and drive straight until you find a free parking spot, then park your car
3. Walk to the entrance of the Attractions & Entertainment building, following the posted signs
4. Enter the building and follow the wayfinding system

CIRCULATION DIAGRAM

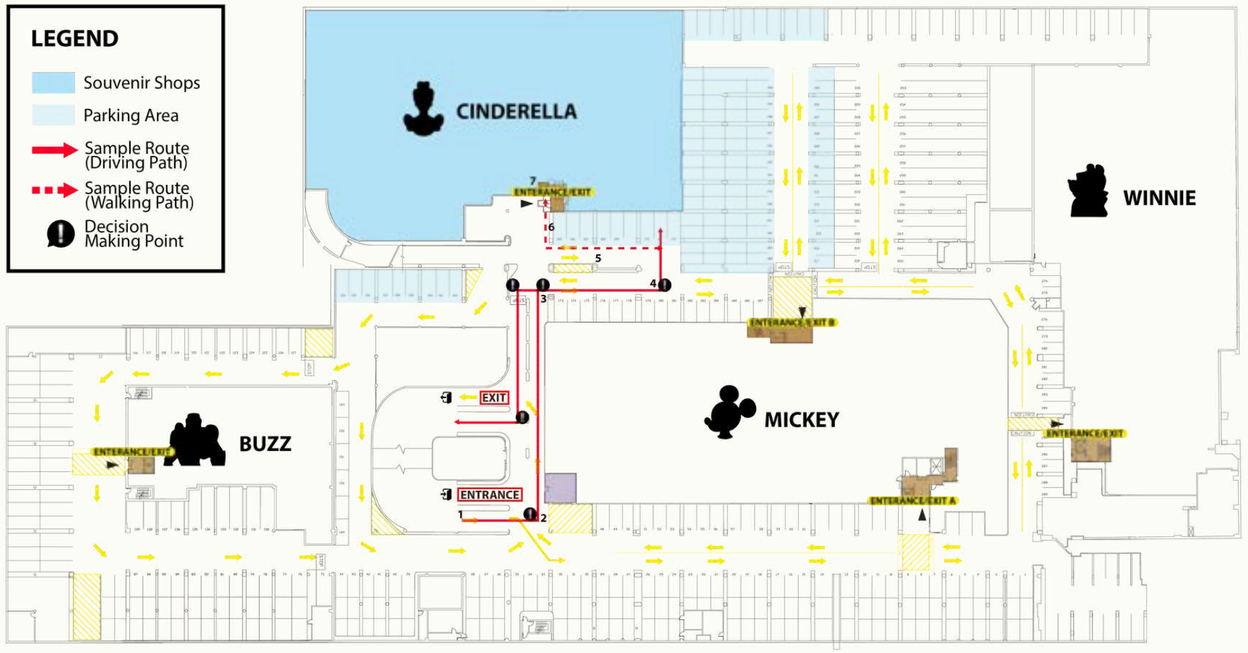

SAMPLE ROUTE - RESTAURANS & REFRESHMENTS BUILDING

1. Enter the parking lot through the main entrance
2. Turn right and drive straight between the Attractions & Entertainment's parking area
3. Turn left and continue straight until you find a free parking spot, then park your car
4. Walk to the entrance of the Restaurants & Refreshments building, following the posted signs
5. Enter the building and follow the wayfinding system

CIRCULATION DIAGRAM

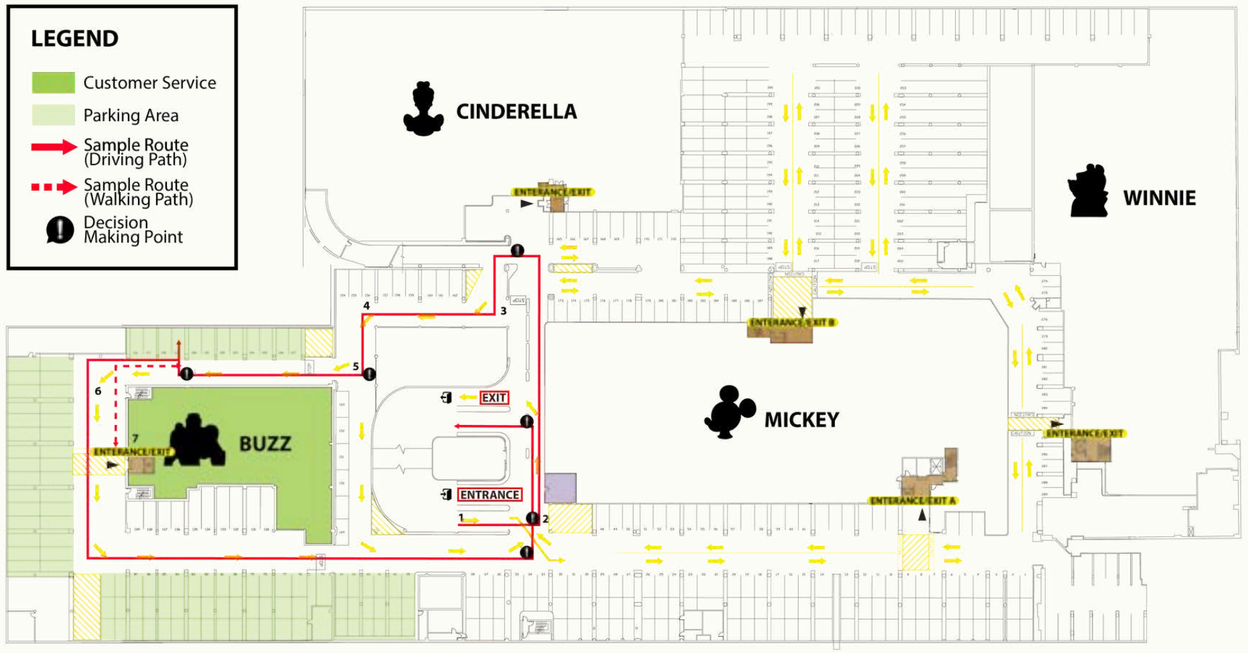

SAMPLE ROUTE - SOUVENIR SHOPS BUILDING

1. Enter the parking lot through the main entrance
2. Turn left and drive straight along the Attractions & Entertainment building
3. Turn right and continue straight, following the signs for the Souvenir Shops parking
4. Turn left to enter the Souvenir Shops parking area
5. Turn left again and continue until you find a free parking spot, then park your car
6. Walk to the entrance of the Souvenir Shops building, following the posted signs
7. Enter the building and follow the wayfinding system

CIRCULATION DIAGRAM

SAMPLE ROUTE - CUSTOMER SERVICES BUILDING

1. Enter the parking lot through the main entrance
2. Turn left and drive straight along the Attractions & Entertainment building.
3. When you reach Souvenir Shops building make a u-turn
4. Drive straight, following signs for Customer Services parking
5. Turn left and continue until you find a free parking spot, then park your car
6. Walk to the entrance of the Customer Services building, following the posted signs
7. Enter the building and follow the wayfinding system

WAYFINDING EXAMPLES

IDENTIFICATION SIGNS

- Easily identifiable visual markers for both pedestrians and drivers that display the name and function of the place
- The FIRST impression
- These signs are good examples because they use loud and vivid colours, which are suitable for a theme park.
- They also incorporate famous cartoon characters, which makes the design much more fun and family-friendly.

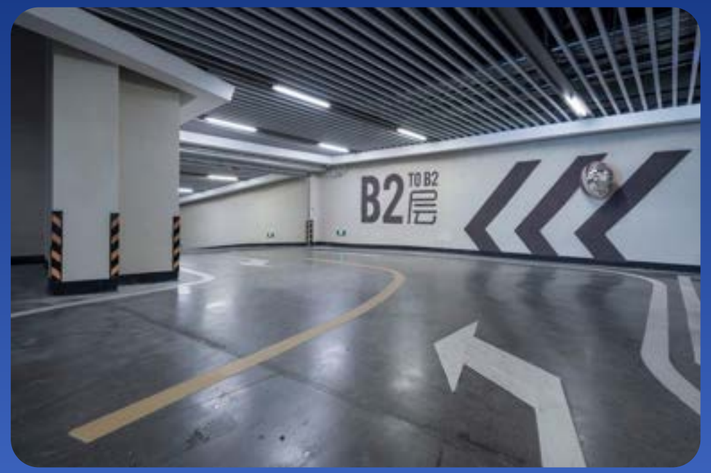

DIRECTIONAL SIGNS

- Directing to specific points or destinations
- It allows for quick navigation and is straightforward, encouraging users to keep moving once they reach an area
- These signs are good examples because they are bold, simple, obvious, and easily recognizable. The large directional graphics help maintain smooth customer flow throughout the area.

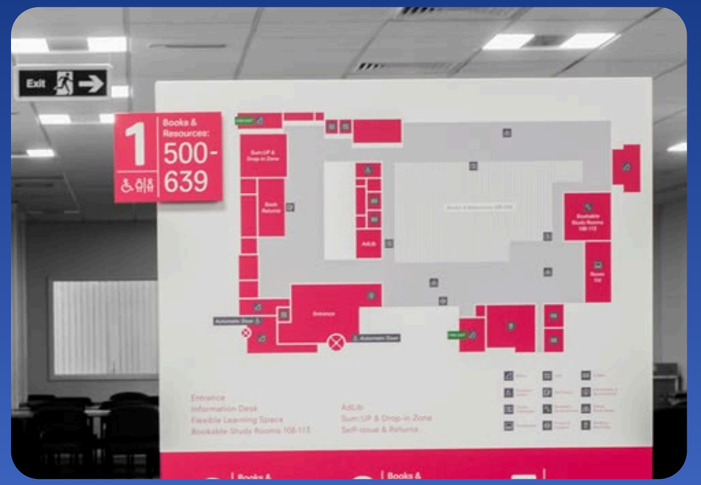

ORIENTATION SIGNS

Level 1

Overall directory to help people navigate and understand their location relative to the whole space

Level 2

These are good examples because theme parks and parking lots can be very confusing to navigate. Using a combination of clear text, symbols, and colours helps guide users more effectively.

REGULATORY SIGNS

The DO's and DONT'S

Noticeable to communicate instructions or warning information

These are good examples because they stand out, have very simple designs, and are straightforward to understand

ENVIRONMENTAL WAYFINDING SITE

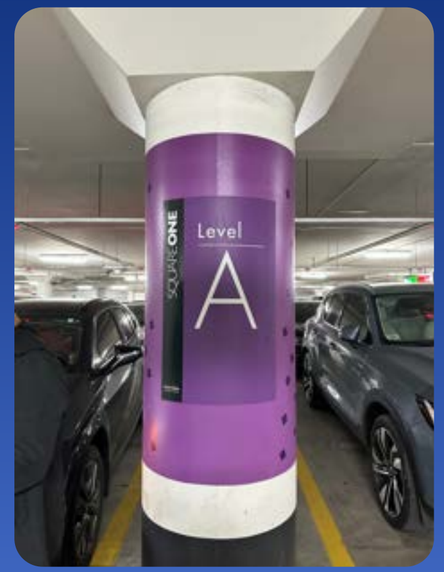

SQUARE ONE MALL

SQUARE ONE MALL

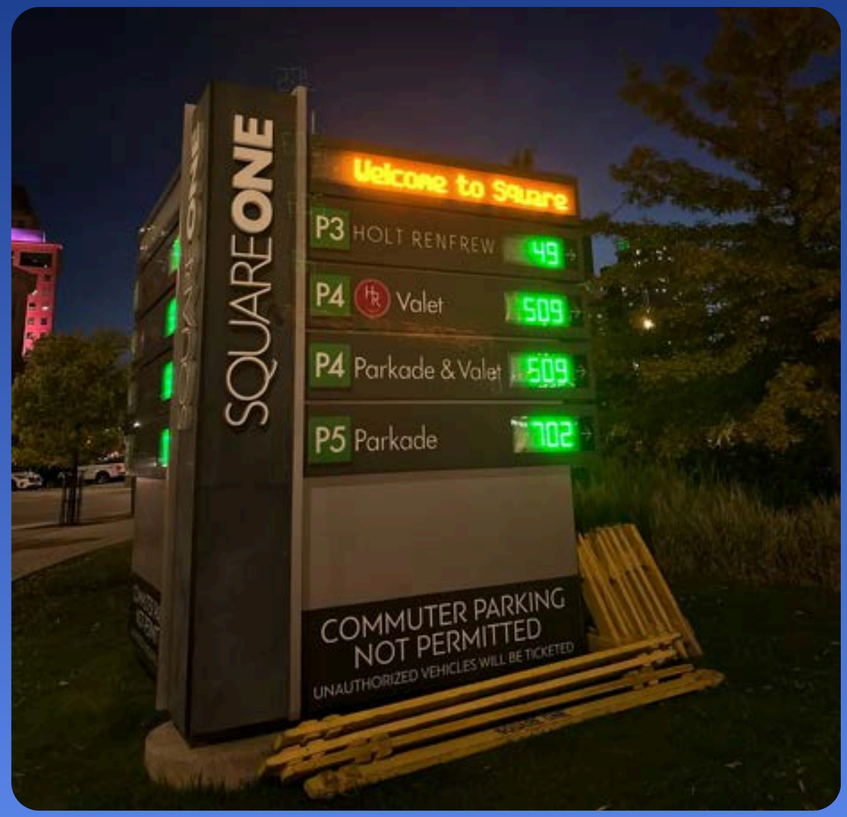

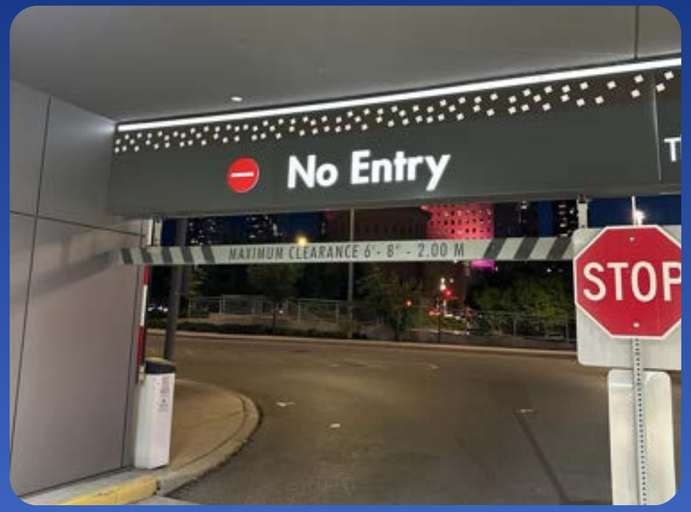

SQUARE ONE MALL

SQUARE ONE MALL

SQUARE ONE MALL - Overall Evaluation

Strengths

- Plenty of Signs:
  - Easy identification of parking areas, directions, and a live quantity counter of available parking spots

- Parking Pillars:
  - Simple and clearly marked to indicate floor levels or area

- Plenty of Regulatory Signs:
  - Ensure safety within a high-demand parking lot

SQUARE ONE MALL - Overall Evaluation

Weaknesses

- Main Entrances to the Mall:
  - Lack a strong first impression
- Parking Pillars:
  - Color coding doesn't match the entrance locations
- No LARGE Directional Signs:
  - Navigation is slower, confusing, and inefficient
- Worn-out Pavement Markings:
  - Difficult to follow or identify

WAYFINDING STRATEGY

WAYFINDING STRATEGY

DESIGN APPROACH

- Easy navigation for families, reducing stress and frustration
- Colour coding: Vivid colours → instant visual recall
- Iconic character silhouettes on pillars, mounted signs, and graphic walls to clearly show the guest's location
- Consistent names and symbols like character icons and arrows
- Use of 3D design elements at key points to add a high-end finish and attraction

ALIGNMENT WITH CLIENT BRAND

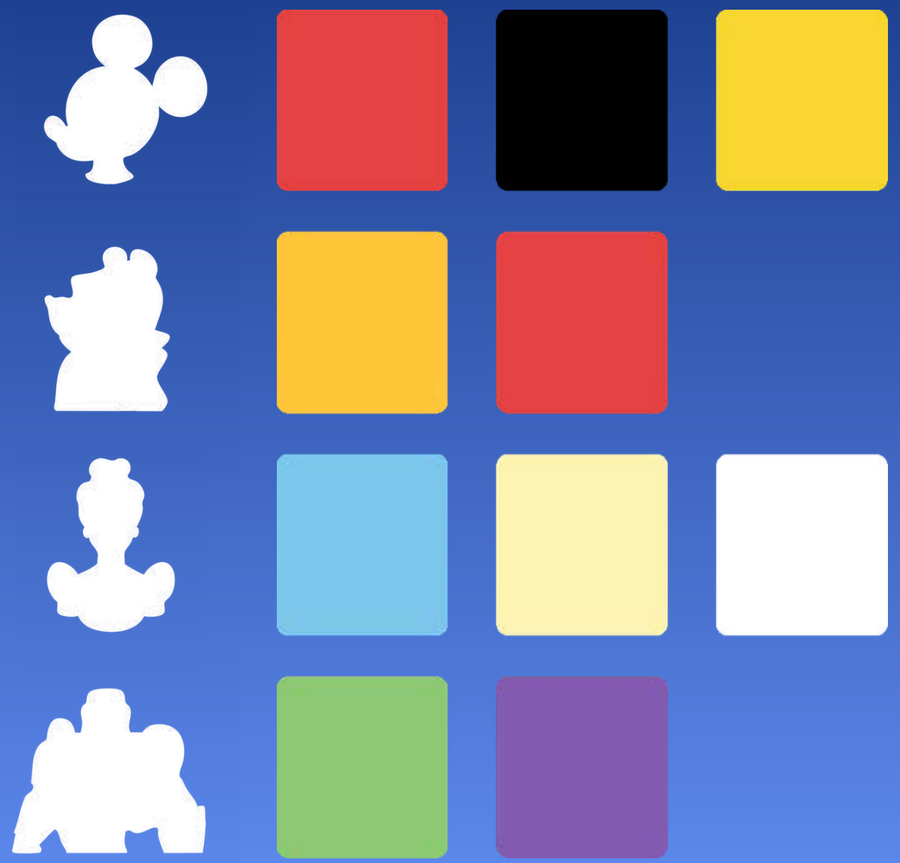

How the design fits Disney:

- Uses Disney characters and colour palettes for strong brand consistency
- Characters create emotional connection for families and nostalgia for adults
- The experience feels immersive and playful, matching Disney's identity

GOAL

Ensure the parking lot system is easy to navigate for all families, reducing stress and frustration by using clear signage, vivid colour coding, and recognizable Disney character icons

WAYFINDING STRATEGY

Each zone has a clear, recognizable character icon:

BUILDING NAMES & ICONS

- Building 1 – Mickey Mouse (Attraction & Entertainment)
- Building 2 – Winnie the Pooh (Restaurant)
- Building 3 – Cinderella (Souvenir Shop)
- Building 4 – Buzz Lightyear (Customer Service)

They help customers identify areas quickly while adding personality

Paired colours for fast recognition:

COLOUR CODING SYSTEM

- Mickey → Red + Black/Yellow
- Winnie the Pooh → Yellow + Red
- Cinderella → Pastel Blue + White/Yellow
- Buzz Lightyear → Green + Purple

ORIENTATION MAP

Materials

- **LED Light Behind** (Backlighting)
- **Acrylic Board:** Acrylic provides the reflective, sophisticated finish necessary for premium branding.
- **Cast Vinyl film** (Graphic Layer): A high-resolution printed vinyl film is applied to the face of the acrylic board to display the map details accurately.
- **Flush wall-mounted**

LOBBY SIGN 3D MODEL

Description:

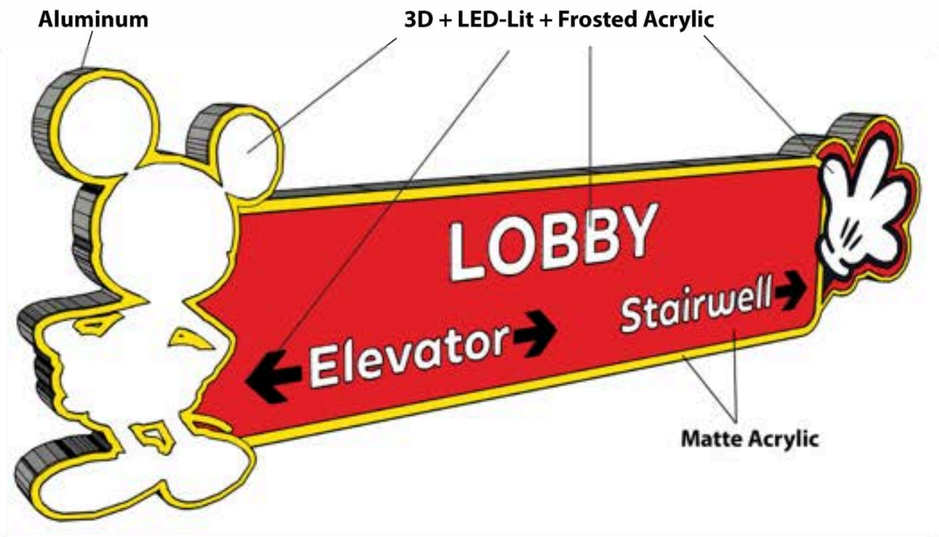

Materials:

- 1) Matte Acrylic
  - Red Background and Yellow Border
- 2) Frosted Acrylic
  - The 3D raised elements, such as the letters and icons
- 3) Aluminum
  - Main base of the whole sign
  - Serve as the housing for the LED lights

Raised 3D Elements & LED Lights:

- Only selected parts of the sign, such as the letters and icons, are 3D and LED-lit, rather than illuminating the entire panel

DL-M-1

Mounting Style: Wall-Mounted (Wall-Plaque)

ELEVATOR SIGN 3D MODEL

Description:

Materials:

- 1) Matte Finishing Acrylic (Outer layers)
  - Used to create the full clapperboard shape (front and back), including the red panel, the Mickey Mouse silhouette, clapper arms, and the mounting bracket

- 2) Aluminum (Middle Layer)
  - Placed between the acrylic panels
  - Serve as the housing for the LED lights

- 3) Frosted Acrylic
  - Elevator symbol and behind the brand logo cut out

Mickey Mouse Shape w/ Brand Logo:

- The brand logo is cut out from the Mickey Mouse–shaped acrylic piece
- A small, thin piece of frosted acrylic will be embedded into and behind the Mickey Mouse acrylic piece, covering the cut-out

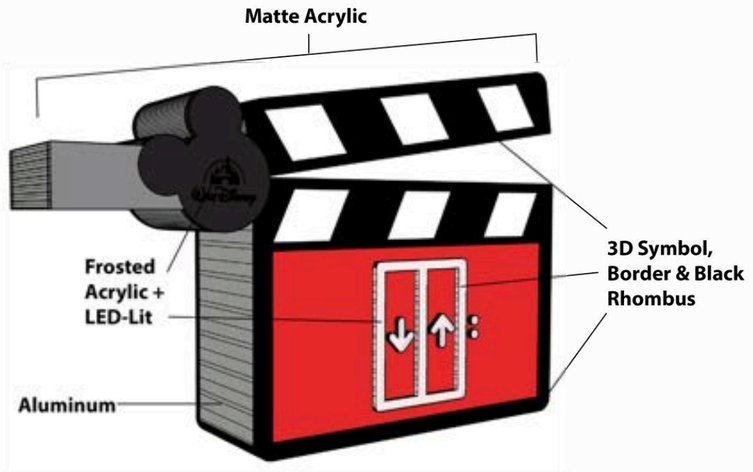

Raised 3D Elements:

- Elevator symbol, the border of the clapperboard, and the black rhombus shapes on the clapper arms

LED Lights:

- Elevator Symbol and Brand Logo

ID-10-M-1

Mounting: Flag-mounted (Projecting Lollipop)

STOP SIGN 3D MODEL

Description:

Materials:

- 1) Reflective Vinyl Print
  - Displaying to Regulatory Sign Information
- 2) Aluminum
  - Used to create the sign shape
- 3) Perforated Galvanized Steel Rod
  - Used to create the pole, which will be mounted to the ground and to the sign
  - Perforated with circular holes running vertically for mounting

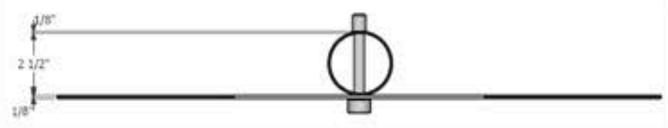

RS-1-1 to RS-1-17

Mounting: Ground-Mounted (Lollipop-Style)
